Date : 08/02/2023

Time : 9.30am to 11.30 am

Duration : 2.00 hr

Teacher name : Dr. Sunil Jadhav

Venue : Kaushalya Simulator and skill center.

Hon. Shri. Annasaheb Dange Ayurved Medical College,
Ashta

Model : Catheterization Simulator

Hands on Training: He taught all Catheterization technique. He gave the instructions protocol to student 1 in group

Sop for Catheterization

Male catheterization (Picture .1)

1. Gently insert the catheter into the urethra opening on the penis.
2. Move the catheter in until urine begins to flow out. Then insert it about 2.5 centimeters (1 inch) more.
3. Let the urine drain into the container or the toilet.

Female catheterization (Picture .2)

1. Gently open the lips of vagina and identify the urethral opening.
2. Gently insert the catheter into the urethral opening.
3. Move the catheter in until urine begins to flow out. Then insert it about 2.5 centimeters (1 inch) more.
4. Let the urine drain into the container or the toilet

Sop for Intubation

Intubation is an essential skill for an APRN or nurse anesthetist. Most intubation is done within a hospital, although emergencies can require the procedure at the site of an accident.

Here is the process for performing intubation:

1. The patient is sedated, usually through an IV.
2. An oxygen mask is placed over the nose and mouth to provide extra oxygen, then removed.
3. The healthcare provider stands at the end of the bed above the patient's head.
4. The patient's head is tilted back to open and straighten the neck and throat.
5. A laryngoscope shines light down the throat and flattens the tongue.
6. The tube is inserted and maneuvered past the epiglottis into the larynx and the trachea.
7. A small balloon is inflated around the endotracheal tube to ensure it stays in place. This also blocks air from escaping.
8. Now the tube is taped or tied in place at the mouth.
9. The tube's function is tested by listening to lung activity with a stethoscope.
10. A chest x-ray can also verify things are functioning correctly.

Sop for knot tying

Start with the short thread facing upwards and the long thread facing downwards

Pick up the end of the short thread with the L thumb and ring finger, with the remainder of the thread passing over the L index and middle fingers. Pick up the end of the long thread with the R thumb and index finger

Bring up the long thread with the R hand, to align next to the short thread

Using the L middle finger, whilst still holding the end between L thumb and ring finger, pass the short thread under and then over the long thread

Pull the R hand upwards and the L hand downwards, allowing the knot to rest in position; adjust the tension of the knot as necessary

Come back upwards with the short thread, by holding the end with the L thumb and index finger. Pick up the long thread with the R thumb and index finger and bring downwards, to align next to the short thread

Repeat the same manoeuvre as before, passing the short thread under and over the long thread

Pull the L hand upwards and the R hand downwards, allowing the knot to rest in position; adjust the tension of the knot as necessary

Repeat the same manoeuvre as before with the short thread facing upwards and the long thread facing downwards

Student Clinic Activity Report

Title of Event or Activity: Hands on Training on simulators to student

Date : 12/02/2024

Time : 9.30 am to 11.30 am

Duration : 2hr

Teacher name : Dr. Akbar Walandkar.

Venue : Kaushalya Simulator and skill center,
Hon. Shri. Annasaheb Dange Ayurved Medical College,
Ashta

Model : Spinal Anesthesia

Hands on Training: He teaches how to give Spinal Anesthesia. He gave the instructions protocol to student 1 in group

Sop Of module:

Spinal Anesthesia

The technique of administering spinal anesthesia can be described as the “4 P's”: preparation, position, projection, and puncture. Preparation of equipment/medications is the first step. It is important to think ahead. Discuss with the patient options for anesthesia

Only qualified Anesthesiologist can do Pre-Anesthesia assessment.

2. Pre-Anesthesia assessment of the patient is carried out a day before the scheduled day of operation.

3. Pre-Anesthesia assessment and documentation shall be performed according to the guidelines (Basic Standards for Pre-Anesthesia care described by the American Society of Anesthesiologist)

4. The Pre-Anesthetic assessment may even be carried out prior to admission in case of elective surgeries if required.

5. An appropriate time should be chosen for Pre-Anesthesia assessment before the scheduled surgery to allow adequate preparation of the patient. This also applies to day surgery patients.

6. The Pre-Anesthesia assessment should be performed by the Anesthetist who will conduct the anesthesia .In case the pre-Anesthesia assessment and the conduct of anesthesia are to be carried out by two different HCPs, an effective system should be in place to make sure that the findings of pre-Anesthesia assessment are in the knowledge of the Anesthesiologist who will conduct the process. .

7. An anesthesia plan for the patient is prepared on the basis of the Pre-anesthesia assessment and the same is documented.

8. The anesthesia plan depicts the type of anesthesia (local, general, epidural etc.), monitoring and plan for postoperative analgesia etc.

9. Pre-Operative medication may be prescribed to facilitate the Anesthetic management. The patient's current medication should be reviewed and continued when necessary. Primary and Secondary Healthcare Department 22

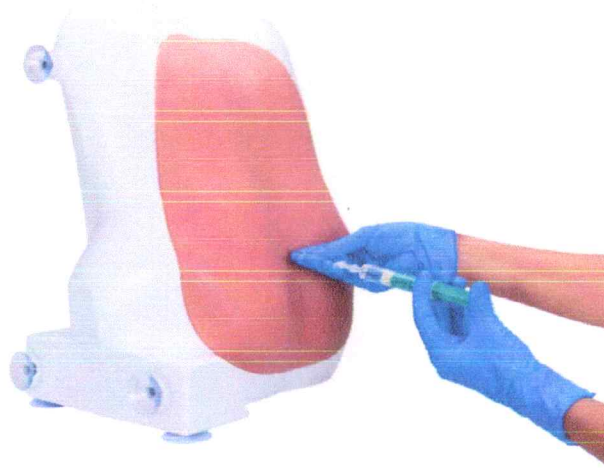

10. Surgeon should be informed of the planned choice of anesthesia for patient after conducting PreAnesthesia assessment.

11. For all surgical interventions, results of laboratory, diagnostic investigations and consultations should be attached to the medical record before pre-medicating the patient and should be sent to the OT.

12. Anesthesiologist may seek input and professional advice from other departments in the preAnesthesia stage. The decision about patient's fitness to undergo anesthesia or otherwise, however, remains the sole responsibility of the concerned Anesthesiologist.

13. There might arise cases in which immediate emergency surgery becomes unavoidable. In such cases, the Anesthesiologist is still responsible for pre-anesthesia assessment. In case the surgery cannot be delayed and the pre-anesthesia assessment protocols cannot be executed in full, the case should be completely documented for future reference.

Hold the preselected tube in your right hand like a pencil, curve forward. Pass the tube into the larynx through the cords in one smooth motion. If the patient is breathing, time the forward thrust for inspiration when the cords are fully open.

NAME OF DEPARTMENT: KAYACHIKITSA

YEAR: - 2021

REPORT

Title of Course: - CPR Training Course

Date: - 04.09.2021 to 18.12.2021

Time: - 2.30pm – 3.30pm Every Saturday

Duration:- 17weeks

Venue: - Auditorium Hall, ADAMC, Ashta.

Objectives of event / activity: -

1. To raises awareness about Cardio Pulmonary Resuscitation.
2. To understand the condition of patient suffering from Cardiac Arrest and Asphyxia.
3. To perform airway management by using appropriate equipments for resuscitation.

Report

Description

Hon. Shri. Annasaheb Dange Ayurved Medical College, Ashta, Department of Kayachikitsa organized Cardio Pulmonary Resuscitation Training Course for final year BAMS students.

Training course was conducted by faculties of department of kayachikitsa according to syllabus. Participants were trained by using simulations of CPR. Lectures were delivered regarding CPR.

We invited Dr. Bhavesh Shaha for delivering lecture and demonstration on Cardio Pulmonary Resuscitation as a guest speaker on 14.10.2021. He was given demonstration and hands on training of CPR on manikins and using resuscitation kit.

CPR TRAINING

Get trained. Save a life. You'll be glad you did.

CARDIO PULMONARY RESUSCITATION TRAINING COURSE

ABOUT US

Hon. Shri Annasaheb Dange Ayurved Medical College and PG Research Center and Dhanwantari Hospital Ashta, Tal. Walwa, Dist. Sangli Maharashtra, India was established in the year 1999 with permission from the Government of Maharashtra, Central Council of Indian Medicine [C.C.I.M.] and Dept of AYUSH, Ministry of health and family welfare New Delhi, India.

VISION

Institute aspires to be world class to generate & sustain excellence in ayurvedic education and research in a supportive and stimulating academic environment. High quality research activity will be proposed in focused areas, with particular reference to research priorities of institute and public health problems. The institute will be a leader in transforming the health of communities through its purposeful integration of education, research and clinical care with compassion and highest ethical values.

MISSION

Institute provide the students a high academic potential with the ayurvedic Medical education of exceptional quality and prepare a physicians and other health care professionals to serve the humanity.

To create awareness regarding Ayurvedic lifestyle, Diet, and Yoga and provide health care services at the community level through well organized and sustained outreach programs.

CPR TRAINING

Get trained. Save a life. You'll be glad you did.

CPR COURSE

The Certified First Aid Professionals course of training held at our centre at Hon. Shri. Annasaheb Dange Ayurved College Ashta, Sangli.

Heart attacks are the leading cause of deaths in the India. As per the statistics, one-fifth of the deaths in India are from Coronary Heart Disease. By the year 2020, it will account for one-third of all the deaths in the country. There is an estimate of 45 million Coronary Artery Disease in India. With an increasing number of young Indians hooked to roller-coaster lifestyle and falling prey to coronary artery disease, the future looks even grimmer.

There is a huge need for Nurses, Paramedics, Doctors, First Responders and even general public to be aware of identifying the symptoms of the cardiac arrest and how to act in case of an emergency. When the people around you are in need of someone to rescue them, you need to have the skills to help them instantaneously. You are the difference between life and death. CPR is an important skill for preserving the life of a victim until they are able to receive better treatment, such as blood circulation.

COURSE OUTCOMES

Course is designed to provide the ability to recognize several life-threatening emergencies, provide CPR, use an AED, and relieve choking in a safe, timely and effective manner. To empower health care providers & community to save lives Deliver protocol based training in Emergency medical Services and trauma care to healthcare providers. Effective networking for disaster awareness.

DEPARTMENT OF KAYACHIKITSA
CARDIO PULMONARY RESUSCITATION (CPR)
TRAINING COURSE (2022-23)

COURSE CONTENT (SYLLABUS)

THEORY

1. Introduction to CPR training
2. Objectives/Responsibilities of First Aider
3. Assessment of Casualty/Unconsciousness
(i) History, (ii) Situation, (iii) Signs, (iv) Symptoms
4. Anatomy of Human Body- discussion on Respiratory, Circulatory & Skeletal system of our body
5. Asphyxia/Airway Obstruction- Choking, Asthma, Drowning
6. Resuscitation (CPR) - Methods of artificial respiration & Chest compression
7. Heart Attack & Cardiac Arrest
8. First aid management of following injuries:
 - (i) Bleeding, Wounds & Shock
 - (ii) Injuries to bone joints and muscles- Triangular Bandage & Arm slings
 - (iii) Neck & Spinal injuries
 - (iv) Heat injuries- Heat stroke, Heat Exhaustion, Hypothermia
 - (v) Eye/Ear/Nose injuries
 - (vi) Epilepsy / Fits
 - (vii) Poisonous bites & Stings
 - (viii) Burn/Scalds

NAME OF DEPARTMENT: KAYACHIKITSA

YEAR: - 2023

REPORT

Title of Course: - CPR Training Course

Date: -08.06.2023 to 14.10.2023

Time: - 2.30pm – 3.30pm Every Saturday

Duration:- 17weeks

Venue: - Auditorium Hall, ADAMC, Ashta.

Objectives of event / activity: -

1. To raises awareness about Cardio Pulmonary Resuscitation.
2. To understand the condition of patient suffering from Cardiac Arrest and Asphyxia.
3. To perform airway management by using appropriate equipments for resuscitation.

Report

Description

Hon. Shri. Annasaheb Dange Ayurved Medical College, Ashta, Department of Kayachikitsa organized Cardio Pulmonary Resuscitation Training Course for final year BAMS students.

Training course was conducted by faculties of department of kayachikitsa according to syllabus. Participants were trained by using simulations of CPR. Lectures were delivered regarding CPR.

We invited Dr. Bhavesh Shaha for delivering lecture and demonstration on Cardio Pulmonary Resuscitation as a guest speaker on 16.10.2023. He was given demonstration and hands on training of CPR on manikins and using resuscitation kit.

This course was helpful in up gradation of knowledge about CPR. Students acquired ability to recognize Assessment of life threatening emergencies and provide CPR using equipment of CPR.

This program was successfully completed under guidance of Head of department and Co-coordinator of CPR program, 95 students were participated in this program.

Outcome of event

This course was helpful in imparting knowledge and giving hands on training about Resuscitation to the participation.

List of documents attached:

1. Permission letter
2. CPR training workshop documents
3. Attendance list of students
4. Feedback from students

CARDIO PULMONARY RESUSCITATION (CPR) TRAINING COURSE

MULTIPLE CHOICE QUESTIONS TEST

Mark 50

Date - 14.10.2023

Time 10am – 12pm

1. How deep should you deliver chest compressions for adults?

- A. 5 to 6 cm
- B. 1 inch
- C. 2 to 3 cm
- D. ½ inches

2. How many chest compressions per round should you deliver?

- A. 20
- B. 10
- C. 30
- D. 15

3. What is the correct method of opening up the airway for children and adults?

- A. Tilt head forward and chin up
- B. Tilt head backward and chin down
- C. Tilt head forward and chin down
- D. Tilt head backward and chin up

4. CPR aims to restart the heart.

- A. Yes
- B. No
- C. Maybe

5. What does CPR stand for?

- A. Cardiac passive resuscitation

SantDnyaneshwarShikshanSanstha's
Hon. Shri. AnnasahebDangeAyurved Medical College

A/p :Ashta, Tal. : Walwa, Dist :Sangli – 416 301

Website : www.adamcashta.com

E-mail : ashta.adamc@gmail.com

B. Cardio pulmonary resuscitation

C. Chest pulmonary revival

D. Cardio pulmonary rescue

6. An infant's pulse should be checked by which artery?

A. Femoral

B. Carotid

C. Radial

D. Brachial

7. Children's CPR should be considered if the patient is less than how many years?

A. 6

B. 8

C. 10

D. 12

8. Infant CPR should be considered for what age?

A. 6 months

B. 12 months

C. 18 months

D. 24 months

9. CAB in CPR stands for?

A. Children, adults, babies

B. Cuts, airs, burns

C. Compressions, airway, breathing

D. None of the above

10. Infants responsiveness is checked by:

A. Shaking the patient and shouting

B. Patting the patient's feet or tapping

C. Splashing cold water on the face

D. All of the above

SantDnyaneshwarShikshanSanstha's
Hon. Shri. AnnasahebDangeAyurved Medical College

A/p :Ashta, Tal. : Walwa, Dist :Sangli – 416 301

Website : www.adamcashta.com

E-mail : ashta.adamc@gmail.com

11. What is the most common obstruction in the airway?

- A. Tongue
- B. Food
- C. Dentures
- D. None of the above

12. The recommended BLS sequence of steps according to the 2010 AHA Guidelines for CPR are:

- A. Airway, Breathing, Chest Compressions
- B. Chest compressions, Airway, Breathing
- C. Airway, Breathing, Check Pulse
- D. None of the above

13. What is the correct compression-to-ventilation ratio when performing CPR alone for victims of any age?

- A. 30 Compressions for every 2 breaths
- B. 30 Compressions for every 1 breath
- C. 15 Compressions for every 2 breaths
- D. 60 Compressions for every 2 breaths

14. You are helping an adult male who has crashed their car in a ditch on the side of the road. He is unconscious and does not appear to be breathing. How do you open the airway for rescue breaths?

- A. Head-tilt / chin-lift
- B. Insert an advanced airway
- C. Oxygen mask
- D. Jaw-thrust maneuver

15. To provide chest compressions to an infant, you should use:

- A. Two fingers placed just below the nipple line
- B. One thumb at the center of the chest
- C. One hand on the center of the chest

SantDnyaneshwarShikshanSanstha's

A/p :Ashta, Tal. : Walwa, Dist :Sangli – 416 301

Phone : 02342-241103/241108, Fax – 02342-241110

Website : www.adamcashta.com

E-mail : ashta.adamc@gmail.com

D. Any of the above

16. A woman sitting at the table next to you at a restaurant grabs her throat and cannot speak. You ask if she is choking and she nods yes. What should you do?

A. Begin CPR immediately

B. Ask her to try and cough. If she cannot, begin abdominal thrusts

C. Deliver 5 slaps on back slaps

D. Use the Jaw-thrust maneuver

17. What is the first link in the adult chain of survival?

A. Preventing heart disease

B. Early CPR

C. Avoiding tobacco use

D. Early recognition

18. What is the recommended amount of time to wash your hands?

A. 10 Sec

B. 1 min

C. 4 min

D. 20 sec

19. You notice that a person has experienced a significant amount of blood loss, has pale skin color, and is becoming confused. What is most likely the cause?

A. Seizure

B. Stroke

C. Low blood Pressure

D. Shock

20. You are eating in a restaurant when a woman cries out. Her six-month-old child is turning blue around the mouth. He appears to be gagging but is not able to cry or take a breath. An older child had just given him some marbles to play with. What is the next step?

A. Begin CPR

SantDnyaneshwarShikshanSanstha's
Hon. Shri. AnnasahebDangeAyurved Medical College

A/p :Ashta, Tal. : Walwa, Dist :Sangli – 416 301

Phone : 02342-241103/241108, Fax – 02342-241110

Website : www.adamcashta.com

E-mail : ashta.adamc@gmail.com

B. Attempt rescue breaths then compressions

C. Deliver back blows and chest thrusts

D. Blind finger Sweep

21. When performing CPR you check for breathing. How long should this check last?

A. Do not check for breathing, continue chest compressions

B. 2 Second

C. 5 Second

D. No longer than 10 Sec.

22. You find a child that is unresponsive. After yelling for help, you check and find the child is not breathing. What is the next step?

A. Leave the child and search for an AED

B. Deliver rescue breaths as most cardiac arrest occur due to breathing problems

C. Begin back blows and chest thrusts

D. Deliver 30 chest compressions

23. You attempt to deliver a rescue breath to an unconscious adult. The breath does not go in. What is the next step in managing this case?

A. Perform abdominal thrusts

B. Begin CPR

C. Go call 911

D. Repeat the head tilt/chin lift maneuver and attempt the breath again

24. You come upon an unconscious victim with a pulse. They do not appear to be breathing. You are unable to deliver the first breath. What is the next step?

A. Begin CPR

B. Repeat the head tilt/chin lift maneuver and attempt the breath again

C. Abdominal thrusts

D. Heimlich maneuver

Website : www.adamcashta.com

E-mail : ashta.adamc@gmail.com

25. You are first on scene and the victim is unresponsive, pulse less and has vomited. You do not feel comfortable performing mouth-to-mouth ventilation. What is the best approach?

- A. Wipe off the face or cover with a shirt
- B. Compression only CPR
- C. Go and get help
- D. Do not initiate resuscitation

Sant Dnyaneshwar Shikshan Sanstha,

**HON. SHRI. ANNASAHEB DANGE AYURVED MEDICAL COLLEGE,
ASHTA**

NAME OF DEPARTMENT: KAYACHIKITSA

YEAR: - 2023

EVENT / ACTIVITY REPORT

Title of Event / Activity: - Workshop on CPR Training

Date: - 16.10.2023

Time: - 03.00pm – 05.30pm

Duration: - 1 day

Venue: - Auditorium Hall, ADAMC, Ashta.

Objectives of event / activity: -

1. To raise awareness about Cardio Pulmonary Resuscitation.
2. To understand the condition of patient suffering from Cardiac Arrest and Asphyxia.
3. Hands on training of airway management by using appropriate equipments for resuscitation along with defibrillation techniques.

Event / Activity report

Description

Hon. Shri. Annasaheb Dange Ayurveda Medical College, Ashta Dhanwantari Hospital Ashta, Department of Kayachikitsa organized CPR training workshop on 16.10.2023 for fourth year students.

Dr. Bhavesh Shah, Associate Professor, Pediatric Department Govt. Medical College Miraj was invited for delivering lecture and demonstration on Cardio Pulmonary Resuscitation. He was given demonstration and hands on training of CPR on manikins and using resuscitation kit.

Website : www.adamc.ac.in E-mail : ashta.adamc@gmail.com

This lecture and demonstration was helpful in up gradation of knowledge about CPR. Students acquired ability to recognize assessment of life threatening emergencies and provide CPR using equipments.

This program was successfully completed under guidance of Head of department and Co-coordinator of CPR program and faculty members of Kayachikitsa department. 90 students of fourth year BAMS were participated in this program.

Outcome of event

This workshop and demonstration was helpful in imparting knowledge and giving hand on training about Resuscitation to the participation. Students can able to do these CPR techniques individually.

List of documents attached:

1. Permission letter from Principal
2. Notice for the participation
3. Invitation Letter to guest
4. Attendance list of students
5. Thanking letter to Guest
6. Feedback from student
7. Photos of event.
