Maintenance of Hygiene of material storage & finished products:

Ayurveda always emphasizes consumptions of freshly prepared foods. Hence we prepare recepies as per requirements of patient and immediately serve them, before their cooling. We don't store any finished product.

Furthermore, we have a clean wooden cupboard and shelf to store raw materials. As per need, we reward certain raw material form patients and remaining are purchased form retailers. Preparations are made in very hygienic conditions by our cook. Cleaning and drying of used stainless steel utensils are done immediately after used.

At the end of daily work, pathya unit is cleaned properly and room is closed to avoid any contaminations.
