Department of Shalakyatantra

Details of the Training Program of Kriyakalpa of Therapists: 2023-24

The activities undertaken by the institution to promote the practice of various Kriyakalpas involve unique procedures practiced in Shalakyatantra, which have a wide range of implications in managing Netrarogas, as well as Karna, Mukha, Nasa, and Shirorogas. Various medicines used in Kriyakalpas have been found to be very effective in conditions such as Timir, Abhishyanda, Arma, Karnabadhiya, Pratishayaya, and Ardhabhedaka. Patients aged between 17 to 60 years, regardless of gender and socioeconomic status, who have conditions like Arma, Karnabadhiya, Pratishayaya, and Ardhabhedaka, are treated by performing various Kriyakalpas in the OPD and IPD of the Shalakyatantra department of Dhanwantari Hospital, Ashta. After taking history, conducting a complete examination, and performing investigations, patients are subjected to Kriyakalpas following Amapachana and MruduAnulomana. Follow-ups are conducted weekly or monthly according to disease conditions. Improvement is assessed based on relief in the signs and symptoms of the diseases. We have successfully treated more than a thousand patients with Netrarogas and Karna, Mukha, Nasa, and Shirorogas over the past seven years through Kriyakalpa treatment, with significant relief in signs and symptoms.
